

# Aluminium high-speed roll-up door

## Alumroll

Alumroll aluminium high-speed roll-up door has been designed to ensure airtightness, supporting high levels of air pressure.

### Functionality and insulation

The anodised aluminium structure and finishes in stainless steel create an aesthetically unique functional door.

It offers superior airtightness and can maintain predetermined pressure levels in laboratories or food-handling areas.

### Finishes

Matt silver anodised aluminium structure, stainless steel screws and structural finishes.

Optional lacquered RAL finish.

Different curtain colours available or customised screen printing.

Option to include transparent vision panels customized in shape, size and position.
